

## Installing and configuring Third-party applications

1. Install and configure **PDF Xchange** for printing PDFs.
  - a. Download and install PDF Xchange Editor (<https://www.tracker-software.com/product/pdf-xchange-editor>)
  - b. Open a PDF **with more than one page in it** and go to File -> Print.
  - c. Select the Digital WarRoom Printer, “fit to printer margins”, and “auto-rotate sheets”.

- d. Click “Print” and save the resulting TIF image to your desktop (we’ll delete it after the next step).
2. Install and configure **Irfanview** for printing images.
    - a. Download and install the 64-bit version of Irfanview. ([http://download.cnet.com/IrfanView-64-bit/3000-2192\\_4-76444710.html?part=dl- &sub=dl&tag=button](http://download.cnet.com/IrfanView-64-bit/3000-2192_4-76444710.html?part=dl- &sub=dl&tag=button))
    - b. Launch Irfanview and browse to the TIF image you created in step 6.c.
    - c. Go to File -> Print. Make sure the options highlighted in red are set as in the screenshot below.

3. Configure **Internet Explorer** as the default handler for the .htm and .html file extensions
  - a. Open Settings in Windows.
  - b. Select “Default Apps”.

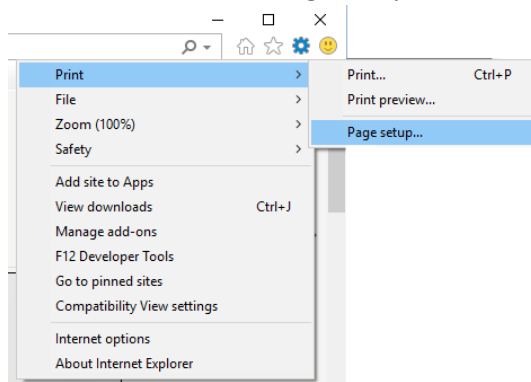

- c. Scroll down the list of applications and select “Choose default apps by file type”.
  - d. Scroll down the list of file extensions until you come to .htm/.html

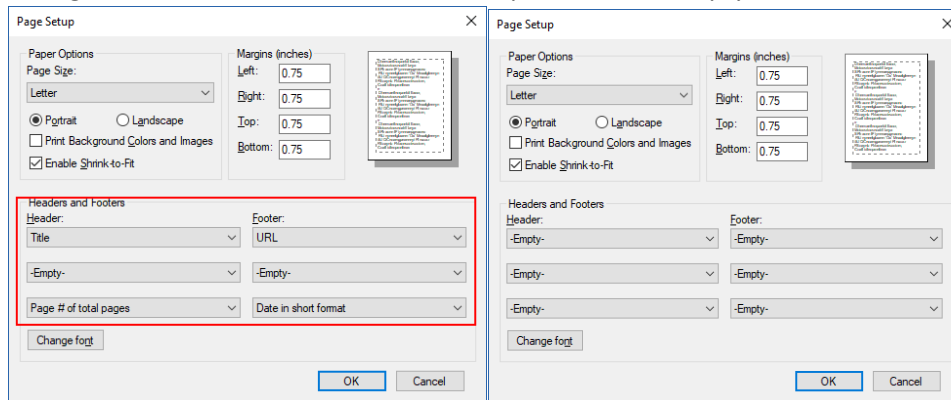

- e. Change the default handler to Internet Explorer if it is not already.

4. Configure **Internet Explorer** for printing.
  - a. Open Internet Explorer.
  - b. Go to Tools -> Print -> Page Setup...

- c. Change all of the Headers and Footers drop downs to “-Empty-”.

5. Install **Microsoft Office 2013** or **2016**.
  - a. Create these 2 folders if they do not exist:
    - C:\Windows\System32\config\systemprofile\Desktop
    - C:\Windows\SysWOW64\config\systemprofile\Desktop
